Associates of Anniston LLC

Shelley H. Ray, M.D.

Dr. Shelley H. Ray is a board certified Dermatologist who specializes in cosmetic, medical, and surgical dermatology. Dr.

Ray is a member of the American Academy of Dermatology and the American Society of Cosmetic Dermatology and Aesthetic Surgery.

Dermatology Associates of Anniston is a unique concept in skin care and a refuge for skin rejuvenation and renewal. Our highly trained staff combines the luxury and distinction of traditional spa techniques with state-of-the-art medical technology. The vanguard of cosmetic advancement along with solid expertise provides skin care that makes a difference. Enjoy the simple elegance and benefit from the long-term results.

Dermatology Associates of Anniston has everything imaginable for skin rejuvenation. Treatments for uneven pigmentation, sun damage, melasma, Rosacea, flushing, red skin, broken capillaries, fine lines and wrinkles, acne, acne scarring, spider leg veins and unwanted hair, as well as the latest in cosmetic fillers, are offered under the supervision of Shelley H. Ray, M.D.

## Cosmetic Medical Treatments

**IPL PhotoRejuvenation** is a series of Intense Pulsed Light treatments that improves the appearance of Rosacea, flushing, sun damaged skin, age spots, skin texture, and photoaging. Treatment also improves mild acne scars, corrects dark circles around the eyes, reduces large pores, fine lines, and stimulates deep tissue collagen remodeling. Treatment involves little or no "down time." Resume normal activities immediately.

Intense Pulsed Light is applied in a series of gentle pulses. Without damaging the skin, the light penetrates through the epidermis and is absorbed by the abnormally dilated vessels or pigmentation. The heat causes damage to the vessel or lesion, and the body begins its natural healing process. After each treatment, the skin will feel smoother and appear to have a more even tone.

**Laser Hair Removal** is FDA approved for the permanent reduction of unwanted hair from all parts of the body. A safe, effective and affordable alternative that leaves your skin looking and feeling soft and smooth.

**Leg Vein Therapy**, using a combination of Laser Treatments and Sclerotherapy that is safe and effective for treating many types of leg veins, including shallow spider veins and reticular veins.

**Microdermabrasion** is a non-surgical exfoliating treatment that improves the appearance of acne scarring, sun-damaged skin, age spots, freckles, stretch marks, fine lines, scars and rough skin. Treatment can be performed on the face, neck, chest, hands, back, elbows and feet.

**BOTOX® Cosmetic** is an FDA approved muscle-relaxing agent that reduces expression lines and corrects the visible signs of stress and aging, leaving you looking and feeling years younger.

**Restylane®** is a long-lasting cosmetic filler that provides dramatic results for improving the appearance of facial lines, wrinkles and folds. This is a non-surgical solution to soften facial lines and wrinkles, restore volume and fullness to the skin, plump up lips, and fill in scars. Restylane injected into the lips can give back fullness to lips that have receded. The cosmetic results are visible immediately, bestowing you with a more youthful and invigorated look.

**CosmoDerm®** is one of the first FDA-approved dermal fillers made from human collagen. There is no pre-treatment test required, and results can last up to 3 months. The results are immediately noticeable and leave you looking refreshed and more youthful. CosmoDerm is typically used in conjunction with Restylane injections to help improve the appearance of superficial and very fine lines.
